

## Singhai Singapore Secures Full Crew Manning for MV. PSA Sustainability and Strengthens Partnership with PSAM

Singhai Singapore is proud to announce the successful takeover of the full Myanmar crew manning for MV. PSA Sustainability on 1 October 2025, an Inter-Gate (IG) vessel operating in Singapore waters. This milestone follows months of careful preparation and close coordination with the PSAM team, resulting in a flawless transition from the previous ship manager.

The project presented significant challenges, particularly due to the tight timeline and complex workflow involved in securing Singapore Work Permits for the crew. Our team ensured full compliance with the requirements of both the Maritime and Port Authority of Singapore (MPA) and the Ministry of Manpower (MOM). Through the combined efforts of Singhai Singapore, Singhai Yangon, and our associate partners, the necessary Myanmar crew were selected, mobilized, and deployed in accordance with all regulatory standards.

Our client, PSAM, commended Singhai for our quick response, strong support, even at times, beyond our typical scope. They were impressed with our expertise in identifying and preparing qualified crew. This recognition highlights our ongoing commitment to providing professional,

reliable, and responsive crewing solutions.

Looking forward, Singhai Singapore will take over two more vessels in the near future, alongside additional vessel purchases planned by our client. With the experience gained from PSA Sustainability and the strong partnerships built with PSAM, MPA, and MOM, we are confident of achieving equally seamless results in these upcoming projects.

Importantly, after a rigorous tender and screening processes, competing against several internationally recognized crewing companies, Singhai Singapore was chosen as PSAM's partner of choice. This appointment underlines not only our proven track record but also PSAM's confidence in Singhai's ability to deliver sustainable, high-quality crew management solutions. It also supports PSAM's strategic direction to strengthen its position as both Shipowner and Manager, with Singhai providing the manpower expertise to turn this vision into reality.

At Singhai, we take pride in being a trusted partner for global shipowners and managers, offering end-to-end solutions that ensure compliance, reliability, and operational excellence. The success of this takeover further strengthens our reputation as a leading maritime crewing company, delivering value where it matters most.
