

Singhai Yangon Attends 2026 World Maritime Day Celebrations, Myanmar Female Seafarers Showcase Professionalism Onstage

From September 23 to 24, the 2026 World Maritime Day (Myanmar) celebrations were held in Yangon. Hosted annually by Myanmar's Department of Marine Administration (DMA), the event is the most prestigious and widely attended annual gathering in Myanmar's shipping industry. This year's forum and celebrations brought together DMA officials, representatives of foreign maritime administrations from several countries, and heads of seafarer recruitment and placement services (SRPS) to discuss maritime safety, seafarer rights, and sustainable industry development.

As a shipping service provider with a long-standing presence in Myanmar's seafarer market, Singhai Yangon was invited to attend the event, showcasing its brand strength and industry standing in Myanmar crew management.

A highlight of the celebrations was the performance by Singhai's female Myanmar seafarers serving aboard StarDream Cruises (https://www.tiktok.com/@singhai.marine.se/photo/7689421064002227463?is_from_webapp=1&sender_device=pc). At the World Maritime Day ceremony on September 24, they sang the 2026 World Maritime Day theme song and

performed in a skit, winning round after round of applause from guests present with their professional and engaging performance. Their poised and confident stage presence is a vivid reflection of the excellent professionalism of Singhai seafarers.

During the event, the Singhai delegation also had a cordial meeting with the head of Uniteam Training and posed for a group photo. The two sides held in-depth discussions on seafarer training cooperation, laying a solid foundation for future joint training of high-quality international seafarers.

Singhai remains committed to providing quality seafarers to global shipowners and actively supports the career development of local Myanmar seafarers, especially women. Through its participation in this year's World Maritime Day

celebrations, Singhai has further raised its brand awareness in Myanmar and across the international shipping community.

With many years of experience in international crew dispatch, Singhai has developed proven operational capabilities in multinational mixed crewing. Its experienced shore-based team is well versed in multicultural management and is supported by robust cross-cultural communication and training mechanisms, ensuring efficient collaboration and safe duty performance among seafarers of different nationalities.
